

## Nimblekids

--Specialized care for special kids--

“**NimbleKids**” is a division under Care Continuum Private Ltd. (CCPL) for Neonatal & Paediatric Rehabilitation. This is a one-of-its-kind service being introduced for the first time in Kolkata, which has, so far, not had any organized facility for children with special needs.

For providing this service, **CCPL** has entered into an exclusive agreement with **Dr. Snehal Deshpande**, who has been providing such services for special kids in **Mumbai, Delhi, Nagpur and Pune** through **Sneh RERC**, an organization set up by **in 1996**,

Under Dr. Snehal Deshpande’s supervision, **a multi-disciplinary team** will provide treatment for babies with, or at risk of, developmental delay, musculoskeletal and orthopaedic conditions, cardiorespiratory conditions and neuromuscular disorders, after she has performed the initial assessment and laid out a Care Plan.

The multi-disciplinary team comprises of Physiotherapists, Occupational Therapists, Speech Therapists, Nutritionists, Clinical Psychologists, Special Educators and Orthotists. All these professionals, associated with CCPL, shall undergo training and sensitization programmes at her Mumbai facility to familiarize themselves to the treatment protocols on offer.

What is unique about this programme is that for the first time in the country, the care shall be provided in a combination of the clinic and the child’s home. This regime combines the convenience of the children getting these specialized inputs in the comfort of their homes, with development of the children’s social skills, while interacting with other kids in the clinic.

**Dr. Snehal Deshpande will be visiting Kolkata for two days in a month**, starting this September, to hold clinics where she will evaluate children with special needs and lay down a **Customized Care Plan and Goal Setting** for each child. The Care Plan will then be followed by the trained therapists at home and at Nimblekids clinics.

To book an appointment in these monthly clinics, the parents will need only to ring 7044074009 / 033 40054009 and ask for a Nimblekids slot.

The kind of conditions that would maximally benefit from such interventions are:

- Prematurity related problems with Early Intervention
- Neuro-developmental issues
- Musculoskeletal injuries and conditions affecting the joints, muscles or posture
- Post-operative orthopaedic rehabilitation
- Neurological rehabilitation
- Acute and chronic cardio-respiratory
- Cerebral palsy
- Autism
- Developmental disorders
- Congenital anomalies

There are, of course, many other conditions which benefit from such interventions.

**Previously, children with such special needs have had to travel outside the state to get their specialized care. Now, with Nimblekids at your doorstep, that will no longer be necessary.**
